

# BALCK PAPER DATZ-DTZ

JOIN THE ECONOMIC REVOLUTION OF GAMERS  
NEKO ANDE

## INTRODUCTION

**Blockchain technology has become the most disruptive invention since the Industrial Revolution. The growth in public awareness of the advantages of blockchain and the value of digital assets continues to accelerate, leading to expanding market demand for digital tokens.**

**A digital currency like Bitcoin is the go-to technology, and smart contracts are now a financial transaction solution for the shortcomings of the traditional business model. Smart contracts in 2021 are completed more competently, efficiently, intelligently, and with a reduction in human 'checkout'.**

**The evolution of money in games and digital assets is affecting all industries, and implies that blockchain-based currencies will one day dominate the market.**

**Datz is friendly and something indulgent of new users. After all, they start them with the token in the easiest way possible through a fun attitude, taking into account that the economy of games, gamification and education is a main objective of the project, finally allowing everyone to manage CRYPTO assets**

## 🔗 WHY DATZ ON BLOCKCHAIN?

Blockchain outperforms all traditional databases in the areas of; **lower costs, transparency, accountability, security and immutability.**

The growing boom in the gaming market on the blockchain led us to use multiple tools to dominate part of the market that is to come.

And the Blockchain has essential properties:

- **High transparency**
- **Verifiable incorruptibility:** Every transaction in every block is fully visible and yet anonymous. It is inherently very difficult to go back and delete or change information on a blockchain, and this results in its lasting immutability and incorruptibility.

As a digital token, DATZ leverages blockchain technology to provide three basic advantages to participants in the token ecosystem:

- **Security:** Transactions in the ecosystem are more secure because confidential and personal information, such as credit card numbers or bank accounts, is not disclosed, greatly reducing the risk of fraud and theft.
- **Speed Without intermediaries,** digital tokens are faster than paying with a plastic card because the value is transferred directly from one party to another. This increases the speed and efficiency of transferring anything of value in the Ecosystem.
- **Quick and easy simplicity.** Simply open your e-wallet on any smartphone and take the QR code. 2 seconds and **DONE**

## ¿WHAT IS DATZ 2.0?

DATZ token BEP20 (DTZ 2.0)

0xd4cb4502a318d44a6aeb5cc3b4fc20fe499cc48

**DATZ changes the economy of games, many games and many projects linked to a common token.**

Datz is friendly and something indulgent of new users. After all, they start them with the token in the easiest way possible through a fun attitude, taking into account that the economy of games, gamification and education is a main objective of the project, finally allowing everyone to manage CRYPTO assets.

**Games have always been around**, from the famous old super mario to the legendary and epic call of duty. Each and every one of them manages a non-profitable economic market since for more money you invest in the game, he will not return your money or your time.

Well imagine you play one game and you earn 30 coins and then start in other and there you need to buy a gun that costs you 20 coins you can play all the game or you join Datz, because with Datz **you can move the currency of one to other** and buy the you so much. This way you won't waste your time on games and your money? Datz will be listed in centralized and decentralized markets where you can exchange it to other currencies.

Its greatest importance lies in being a store of value based on blockchain technology, an invulnerable and decentralized network that guarantees its stability.

DATZ allowed him to do cryptocurrency mining, of the “liquidity mining” type. Depositing your tokens to a liquidity pool, to earn more coins without the need for expensive equipment or high electrical expenses, a new type of mining thanks to finance (DeFi).

## COMPATIBLE WALLETS

The cryptographic wallet to be used in the DATZ ecosystem are:  
**Trust Wallet, Metamask** and all those that allow the **Binance Smart Chain token BEP-20 network**

## ECONOMY AND SUPPLY

### TOKEN DATA

Name	<b>DATZ</b>
SYMBOL	<b>DTZ</b>
Total supply	<b>1.000.000.000</b>
Decimals	<b>18</b>
